

SPX COOLING/MARLEY COOLING TOWERS

- Factory Assembled Cooling Towers
- Field Erected Cooling Towers
- Closed Loop Fluid Coolers
- Recold Evaporative Condensers
- Free Inspections
- Repair Services

NIMBUS ADVANCED PROCESS COOLING

- Reduces water consumption up to 95% compared to traditional fluid coolers
- Does not rely on reservoir of standing water — eliminating a primary breeding ground for Legionella bacteria and winter sump freezing
- Adiabatic spray helps prevent summer overheating issues
- Does not require chemical treatment programs — saving thousands of dollars annually compared to traditional fluid coolers
- Stainless steel construction standard
- Quick installation

- Sized from 5 tons - 450 tons of heat rejection per unit
- Virtually maintenance-free
- Corrosion-resistant copper tubing and coated aluminum fins
- EC or NEMA fan motors available to minimize energy consumption

PUROFLUX FILTRATION

MEDIA FILTERS

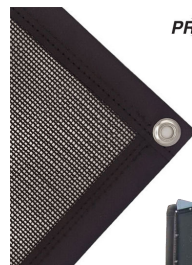

CENTRIFUGAL SEPARATORS

BASIN SWEEPER SYSTEMS

PERMATRON

- Industrial and commercial cottonwood screens
- Pulley or fixed mounting available

PREVENT
